## Nutrition Blended With Taste

Experience the rich taste of organic Honey offered by ESS PEE QUALITY PRODUCTS. We have just stepped into the market as a manufacturer, supplier and exporter of natural honey. The honey provided by us is rich in taste and natural nutrients as it is free from harmful adulterants. Certifications from AGMARK and KVIC along with registration under Khadi and Village Industries Commissions have played a key role in extending roots of the business to the UK and USA. Most advanced and hygienic processes are used for manufacturing

honey with delectable taste that will last for a long time in your mouth. The aim of our organization is to satisfy customers to the fullest with the ethical business policies, excellent quality and prompt delivery services. Hygienic and customized packaging of delectable natural honey offered by us has made us foremost choice of the clients in a very short span of the time.

Natural Honey offered by ESS PEE QUALITY PRODUCTS is 100% natural and organic. We process raw honey under the most hygienic conditions for ensuring highest standards of quality. The Honey available with us is rich in taste and natural nutrients that make it a perfect health product. We make available Honey in hygienic glass bottles, PET bottles and food grade drums at affordable prices.

We are engaged in Supplying and Exporting Honey in bulk quantity to the customers. Our Honey is packed in food grade epoxy coated new MS Steel barrels that weigh 290-300 kilograms net. We offer different types of pale / bucket packing in food grade plastic containers from 5 – 50 kilograms.

We source raw honey from : We procure raw honey from the finest apiaries situated in the rich flower valleys of Himalayas. The processing and packaging work is done at our unit hygienically as per the highest standards of quality.

PRODUCT NAME : TADDY BEAR PACK

**PRODUCT NAME : ORGANIC BEES WAX**

## Processing of Honey

Raw Honey is being properly tested by our experts + these Raw material is being passed through various sieves to filter foreign matter from honey + Filtration is being done by sparkler filter press and if moisture is high then high moisture is being reduced through Moisture Reduction machine and finally collected into Storage tanks. Critical tests like Moisture, HMF , F,G Ratio and Sucrose is being once again tested prior packing , on receipt of clearances. Packing operation is being carried out in complete hygiene condition and Good Manufacturing practices followed by packing personals and all physical attributes are being ensured by supervisor and finally intact outers are being dispatched to markets.
